MERN

MERN Stack Development Course

The MERN stack development course will equip you with the knowledge of all the necessary technologies to successfully make full-stack web applications using MERN- MongoDB, Express.js, React.js, and Express.js. Learn to create dynamic and scalable web applications with our MERN stack development course.

Course Highlights

1. Web Applications and Pages

2. React.js library

3. Node.js and Express.js

4. Best Coding practices and performance optimization
5. 10 Course Modules

6. 180 hours of training

7. Trending Framework Tools

8. 1 year of free backup classes

Learning Outcome

- You will learn to make interactive web pages and applications using MERN technologies.
- You will be able to design a complete front-end architecture of the websites.
- You'll be able to manage the representation and design of the webpage with the application of CSS.
- You will be able to manage, store, and retrieve the data using MongoDB, a NoSQL database.
- You will master React.js including component creation, state management, routing, and integration with APIs.
- You'll learn Node.js to create dynamic web pages with server-side JavaScript development.
- You will build expansive web applications using Express.js.
- You will develop the ability to examine complicated problems to sort their effective solutions for web applications.
- You will learn to optimize the web pages for maximum speed and scalability.
- You'll be able to debug, test, and troubleshoot by learning effective strategies for projects.
